### PROFILE

Motivated and enthusiastic computer science graduate with amazing communication skills and experience in translation, improvement, and overall a people person. Seeking to learn more about life, the different work environments and searching for new ways to improve my skills every day.

### PROFESSIONAL EXPERIENCE

Customer Care Representative

Sitel Group | Remote | May 2021 – September 2022

Academic-level email writing with reassuring customers secured the web technology provided, and worked in a big team, assisting each other.

- Communicated and helped effectively colleagues and supervisors.
- Dealt efficiently and adequately with all types of customers and different situations on a daily basis
- Kept cool even in the most difficult situations and resolved all problems accordingly
- Helped the IT department fix computing, network, and security issues with the provided computer systems
- Expert proficiency in Microsoft Package and editing

Junior Full Stack Developer Internship

Dolphin-3 | Varna, Bulgaria | May 2020–September 2020

Assisted with on-site problems and their solutions during work, while learning from experienced colleagues

- Computer systems assembling and maintenance
- Operational systems Windows 10 and Linux
- Installing servers with OS and system administration of Windows
- Design of computer networks, installing and maintenance of network equipment – Hubs, Switches, Routers, Modems
- Learned security practices and measures from long-term experts
- Assisted in the translation of projects and documents from 3 different languages – English, French, Bulgarian

### PROJECTS

- Machine Learning and AI – Made a model to detect pneumonia from relevant X-Ray images with 96% accuracy
- Full Stack Developer – Developed an educational web application with custom videos and tests based on Programming Concepts and their differences. Used: HTML/CSS/Javascript/MongoDB, JWT
- Software Compiler Editor – Created a compiler to run simple code and functions in C#
- Full Stack HTML – Worked in a team with colleagues to create a website for the University Beer Society
- Advanced AI – Used advanced AI and Keras to calibrate if ANN or CNN is better on a MNIST dataset with diagrams and evaluation
